Placencia is on a peninsula in southern Belize. Belize is on the eastern side of the Yucatan Peninsula, south of Mexico and east of Guatemala. Grid EK56tm, 16.533n 88.362w, barely above the Caribbean sea level. KT7G & N7WO went there to do two contests in two weeks. The Shack of V31MD provided an excellent mangrove swamp mounted vertical and two element 5 band quad. IC-7000 and an Ameritron ALS-600 amp provided the power.

We thank the Clark county ARC, W7VV, W7HUY and Dunestar for the loan of filters. 80-85 F in February, what a great place.
